

Better Handoffs. Every Day. Every Handoff. Every Time.

I-PASS is an evidence-based package of interventions created to reduce communication failures during patient handoffs and transitions of care.

In a large multicenter trial, I-PASS was associated with a 30% reduction in medical errors that harm patients (NEJM 2014).

I-PASS is now being successfully used by more than 70 leading hospitals in the U.S.

Standardized Structure & Content

- I.** Illness Severity
- P.** Patient Summary
- A.** Action List
- S.** Situation Awareness
- S.** Synthesis by Receiver

Benefits of I-PASS Adoption

- ✓ Reduction in handoff safety events
- ✓ Increase in culture of safety scores
- ✓ Actionable step in becoming a high reliability organization
- ✓ Support cultural changes for sustainment
- ✓ Financial savings through:
 - Reduced patient re-admittance
 - Reduced malpractice claims

I-PASS Institute Services & Solutions

- ✓ Wide-scale dissemination across settings
- ✓ Customizable to your institution's workflows
- ✓ Support transitions of services:
 - At change of shift
 - As patients move within the institution
- ✓ Supports ongoing sustainment efforts at your institution
- ✓ Scalable for departmental or institution-wide implementation

I-PASS Institute Services & Solutions

I-PASS CERTIFIED MENTOR

- Clinicians with real-world implementation experience
- Provide guidance and oversight

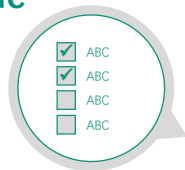

I-PASS PROGRAM MANAGER

- Web tools set up and support
- Ongoing implementation management

Implementation Guide

- Based on experience implementing in 70+ institutions
- Timelines and implementation milestones
- Project Management tracking tools support key I-PASS milestones

I-PASS Written

- Written documentation with EHR integration
- Cloud-based system allows customized data fields for your institutions individual department/unit
- Experience with Epic, Cerner, Allscripts, Meditech

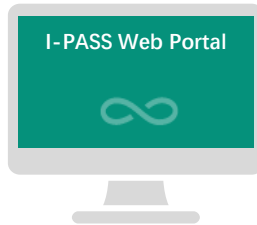

I-PASS Learning

- Simulation based learning platform
- Scalable, interactive training
- Practice and guided self-assessment
- Designed with game design principles

Analytics & Benchmarking

- Track and measure adherence and reduction of medical errors
- Produce customized run charts and institutional benchmarking
- Can integrate with Tableau

I-PASS Assessment

- Cloud-based system allows you to measure adherence and error reduction
- Promote feedback, learning and improvement

Each solution in the I-PASS Program addresses a challenge of large scale implementation. It supports the adoption, training, measurement and adherence, and most importantly long-term sustainment and cultural adoption.
